

# Primera Métrica SonarQube

Lumiere

The screenshot shows the SonarQube Security Hotspots interface. The top navigation bar includes 'Overview', 'Issues', 'Security Hotspots', 'Measures', 'Code', and 'Activity'. The 'Security Hotspots' tab is active, showing a list of hotspots on the left and a detailed view of a specific hotspot on the right. The hotspot is titled 'Make sure not using resource integrity feature is safe here.' and is located in the file '/contacto.html'. The status is 'To review'. The right panel shows the code snippet for the file, which includes HTML and JavaScript code. A red box highlights the specific line of code that triggered the hotspot.

The screenshot shows the SonarQube Measures interface. The top navigation bar includes 'Overview', 'Issues', 'Security Hotspots', 'Measures', 'Code', and 'Activity'. The 'Measures' tab is active, showing a list of measures on the left and a detailed view of a specific measure on the right. The measure is titled 'Security' and is located in the file '/contacto.html'. The status is 'To review'. The right panel shows the code snippet for the file, which includes HTML and JavaScript code. A red box highlights the specific line of code that triggered the measure.

The top screenshot shows the SonarQube 'Overview' page for the project 'MiStartUp'. The Quality Gate is 'Passed'. The last analysis was 10 minutes ago. The overall code quality is 'A'. The metrics shown are:

Metric	Value	Grade
Security	0 Open issues	A
Reliability	5 Open issues	B
Maintainability	0 Open issues	A
Accepted Issues	0	B
Coverage	0.0%	C
Duplications	44.9%	D
Security Hotspots	9	E

The bottom screenshot shows the 'Issues' page for the same project. It displays a list of issues with filters for 'Software Quality' and 'Severity'. The issues are:

File	Issue ID	Message	Severity	Effort
contacto.html	L113	Add a "title" attribute to this <iframe> tag.	Low	5min effort - 12 minutes ago
index.html	L126	Add a "title" attribute to this <iframe> tag.	Low	5min effort - 12 minutes ago
